

AMBIENT MIX

A beautiful, privacy-first ambient soundscape mixer built with React. Mix your perfect focus environment with layered nature and environment sounds — no login, no account, no data collected.

✨ Features

- 🎧 **6 Ambient Sounds** — Rain, Ocean, Fire, Wind, Birds, Café
- 🔊 **Individual Volume Control** — fine-tune each sound independently
- 💾 **Save & Load Mixes** — name and store your favourite combinations
- 📁 **Export / Import Mixes** — share your mixes with friends as JSON files
- ☀️ **Weather-Based Auto Mix** — detects your local weather and suggests sounds automatically
- 📊 **Listening Stats** — track how many minutes you've spent with each sound
- ⌚ **Pomodoro Timer** — built-in focus timer with Focus, Short Break, and Long Break modes
- 🎨 **4 Themes** — Dark, Forest, Ocean, and Cozy
- ✨ **Animated Particle Background** — dynamic particles that react to which sounds are playing
- 🛡️ **Privacy-First** — all data stored locally in your browser, nothing sent to any server

🔧 Tech Stack

Tool	Purpose
React 18	UI framework
Vite	Build tool & dev server
Tailwind CSS	Styling
Howler.js	Audio playback & looping
OpenWeatherMap API	Weather detection (free tier)
LocalStorage	Saving mixes, volumes, and stats

Getting Started

Prerequisites

- [Node.js](#) v20.19 or higher
- npm (comes with Node.js)

Installation

1. Clone the repository

```
git clone https://github.com/YOUR_USERNAME/ambient-app.git
cd ambient-app
```

2. Install dependencies

```
npm install
```

3. Add your sound files

Place your .mp3 sound files inside the `public/sounds/` folder:

```
public/
├── sounds/
│   ├── rain.mp3
│   ├── ocean.mp3
│   ├── fire.mp3
│   ├── wind.mp3
│   ├── birds.mp3
│   └── cafe.mp3
```

You can download free sounds from freesound.org (free account required).

4. Add your OpenWeatherMap API key

Open `src/App.jsx` and replace the API key at the top:

```
js
const WEATHER_API_KEY = "your_api_key_here"
```

Get a free key at openweathermap.org — no credit card required.

5. Start the development server

```
npm run dev
```

Then open your browser and go to <http://localhost:5173> 

Project Structure

```
ambient-app/
├── public/
│   └── sounds/    ← Put your .mp3 files here
├── src/
│   ├── App.jsx    ← Main app component (all features)
│   ├── index.css  ← Tailwind import
│   └── main.jsx    ← React entry point
├── index.html
├── vite.config.js
└── package.json
```

How to Use

Playing Sounds

- Click the  **button** on any sound card to start playing
- Use the **slider** to adjust the volume of each sound independently
- Mix multiple sounds together for the perfect atmosphere

Saving a Mix

1. Set up your sounds and volumes the way you like
2. Type a name in the "**Save Your Mix**" input (e.g. "Deep Focus")
3. Click **Save**
4. Load it anytime from the saved mixes list

Weather Mix

1. Click "**Detect My Weather**"
2. Allow location access when the browser asks
3. The app will suggest sounds based on your current weather
4. Click "**Apply Weather Mix**" to start playing

Stats

- Click " **My Stats**" to see how many minutes you've listened to each sound

Themes

- Switch between **Dark**, **Forest**, **Ocean**, and **Cozy** themes using the buttons at the top

Weather to Sound Mapping

Weather	Suggested Sounds
 Thunderstorm	Rain + Wind
 Rain	Rain + Ocean
 Drizzle	Rain
 Snow	Wind
 Clear	Birds
 Cloudy	Wind + Café
 Fog / Mist	Wind + Café

Privacy

Ambient Mix is fully privacy-first:

- **No login required**
- **No data sent to any server**
- All mixes, volumes, and stats are saved in your browser's **localStorage**
- The only external API call is to OpenWeatherMap for weather data (your coordinates are used temporarily and not stored)

Deployment

Deploy to Vercel (Free)

1. Push your project to GitHub
2. Go to vercel.com and sign up with GitHub
3. Click "**New Project**" and import your repository
4. Click **Deploy** — done! 🎉

Build for Production

`npm run build`

This creates a `dist/` folder with the production-ready app.
